The JST standard applicator range of tooling has been designed specifically for use in the AP-K2N Power Press. When installed in this press they provide the most efficient method of applying chain terminals to a pre-stripped wire. Due to the high quality durable design, these applicators are suitable for high volume operation.

Specifications:

- Compatible with the AP-K2N power press
- Available to suit all JST strip terminals
- Quick crimp height adjustment for conductor and insulation barrels, using dials
- Heavy duty and durable design
- Post-feed or pre-feed cams available

Dimensions:

- Weight: 8Kg
- Shut Height 160.00mm
- 30mm stroke
